## 2017 Food Service Inspections How We Score and Grade

The Health Department employs a grading system as part of the food establishment inspection process. Inspection scores are designed to achieve three goals: to inform the public about a food establishment's inspection results in a simple, accessible way, to improve sanitary conditions and food safety practices in food establishments, and to reduce illness associated with dining out. Prior to inspection grading, food establishments practiced food safety to maintain healthful conditions. Grading introduces another significant incentive to achieve positive recognition by the public.

### **Grading of Inspections**

The Town of Yarmouth Food Establishment Inspection Report is utilized to determine a letter grade. The report reflects the status of the food facility at the time of the inspection. Violations identified during the inspection are assigned a specific point value based on the associated health risk it poses to the public. If violations are identified, points are deducted from a maximum score of 100. Violations fall into two categories, critical and non-critical. Critical violations result in a deduction of 5 points. Non-critical violations result in a deduction of 2 points.

Inspections will produce a letter grade as follows:

#### **Letter Grade**

- A (90-100)
- B (80-89)
- C (<79)

An inspection score below 80 will require a re-inspection within 10 days. An inspection score below 70 requires a re-inspection and attendance by a representative of the establishment at a scheduled Board of Health Hearing. At this time the Board may suspend, condition, or revoke the Food Service License.

The food establishment receiving a score of 80-89 may request **one re-inspection per calendar year**. The inspection would be conducted within 10 business days.

The food establishment receiving a score below 80 that has received a re-inspection cannot request a second re-inspection within the calendar year regardless of grade.

### **Examples of critical violations include: (5 point Deduction) Red Items**

- \* Bare hand contact with ready to eat foods (no gloves)
- \* Toxic chemicals stored over sinks, or food preparation areas
- \* Raw meat over ready to eat foods in walk-in and refrigerators
- \* Hand wash station violations such as no soap, or paper towels
- \* Dishwasher violations, wash or rinse temperatures out of range
- \* Refrigerators out of proper temperature zone, greater than 41 degrees

### **Examples of non-critical violations include: (2 Point Deduction) Blue Items**

- \* Painting needed in restaurant
- \* No thermometers in refrigerators
- \* Grill line equipment needs cleaning
- \* Products not stored 6 inches off the floor
- \* Floors and walls need cleaning and sanitizing
- \* Food not covered and dated in refrigerators and walk-ins

### **Implementation of Grading Program**

Starting May 1, 2017 all existing food establishments will be given an inspection or inspections for educational purposes prior to the implementation of the Food Establishment Grading Program.

Starting September 1, 2017 all inspection grades will be posted online at the Town of Yarmouth Health Department website.

All new food establishments, change of ownership, reopening of seasonal food establishments must be in full compliance with Federal, State and Town Food Regulations prior to opening.

Seasonal food establishments must call 3-5 business days for an inspection and submit an application prior to opening.

If you have any questions please don't hesitate to call the Health Department at (508) 398-2231 ext. 1241.

**BOH Regulation May 1, 2017**
